Response to Arguments

Page 2

1. Claims 18-21, 25, 26, 43-46, 48, 49 and 57-61 are currently pending in the application. Claims 1-17, 22-24, 27-42, 47 and 50-56 have been canceled. The allowance of claims 58-61 as noted in the Office Action dated 8/15/2006 has been withdrawn.

Election/Restrictions

- 2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 18-21, 25, 26, 43-46, 48, 49 and 57, drawn to system for electrically detecting a lack of saliva, classified in class 607, subclass 134.
 - II. Claims 58-61, drawn to housing for an intraoral device, classified in class 340, subclass 573.1.

The inventions are distinct, each from the other because of the following reasons:

- 3. Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another and materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus can be used to practice another and materially different process such as an electronic tracking device.
- 4. Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.
- **5.** A telephone call was made to Shalom Wertsberger on 4/26/2007 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Application/Control Number: 10/500,013 Page 3

Art Unit: 3766

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Oath/Declaration

7. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02. Appropriate correction is required.

The oath or declaration is defective because: It does not state that the person making the oath or declaration acknowledges the duty to disclose to the Office all information known to the person to be material to patentability as defined in 37 CFR 1.56.

<u>CORRECT STATEMENT:</u> should read "I acknowledge the duty to disclose information which is <u>material to patentability</u> of this application in accordance with Title 37, Code of Federal Regulations Section <u>1.56.</u>"

<u>INCORRECT STATEMENT:</u> "I acknowledge the duty to disclose information which is <u>material to the patentability</u> of this application in accordance with Title 37, Code of Federal Regulations Section <u>1.56(a).</u>"

Specification

8. The disclosure is objected to because of the following informalities:

Applicant has not complied with the requirements for the benefit of a prior-filed application under 35 U.S.C. 120 and 119(e), 37 CFR 1.78 (a)(2)(iii), and (a)(5)(iii), since the first line of the specification does not

Art Unit: 3766

acknowledge the U.S. Application Number, Date of Filing and the Status (patented, pending, abandoned) of such applications. See MPEP § 201.11. Appropriate correction is required.

Examiner suggest amending the specification as follows: On line 1, immediately follow the title "SYSTEM AND METHOD FOR ELECTRICAL STIMULATION OF SALIVATION", --This application claims the benefit of priority to PCT Application PCT/IL02/00058 filed January 30 2002, which in turn claims the benefit of priority to United States Provisional Application number 60/264,686, filed January 30, 2001.--should be inserted.

Allowable Subject Matter

9. Claims 18-21, 25, 26, 43-46, 48, 49 and 57 are allowed. Claims 1-17, 22-24, 27-42, 47 and 50-56 have been canceled.

Conclusion

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Shevon Johnson whose telephone number is (571) 272-2010. The examiner can normally be reached on M-F (8 a.m. - 4:30 p.m.).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Carl Layno can be reached on (571) 272-4949. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
